

HIREN BARAD

QA Automation Lead • 10+ Years in Software Quality Engineering

Bengaluru, India | +91 8347550409 | baradhiren@hotmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

With over ten years of IT experience, I bring a comprehensive skill set encompassing both Manual and Automation testing. My approach is characterized by my keen attention to detail. I am proficient in designing and upholding Automation Frameworks and I possess adeptness in managing CI/CD Pipelines, be it on-premise or in the cloud.

PROFESSIONAL EXPERIENCE

Quality Assurance Lead

Apr 2024 – Apr 2026

Vividly

Remote

- Hired as the company's first dedicated QA engineer; established quality processes, entry/exit criteria, and bug triage workflows adopted across all engineering teams.
- Partnered with Product, Engineering, and Design to define acceptance criteria and ship high-quality features into production with measurably fewer post-release defects.
- Co-designed a Playwright-based test automation framework from scratch, covering critical end-to-end user journeys and integrated into the CI pipeline.
- Pioneered the use of AI tooling in QA by building agents that auto-generate and maintain automated test cases, reducing test authoring time and improving regression coverage.

Senior Quality Engineer

Sep 2021 – Mar 2023

TestGorilla

Remote

- Operated as the standalone QA engineer initially; drafted the QA framework from scratch and grew the QA function as the organisation scaled.
- Collaborated with Product, Development, and Customer Success to plan, design, and execute test scenarios for both new and existing features.
- Achieved 40% automated test coverage on the core platform using a Playwright-based automation framework integrated into CI/CD.
- Set up and configured TestRail to centrally manage manual and automation test suites, giving stakeholders real-time visibility into release quality.

Software Development Engineer in Test II

Jun 2020 – Sep 2021

Blackhawk Network

Bengaluru, India

- Designed an automation framework from scratch and reached 84% automated test coverage across critical product flows.
- Worked closely with DevOps and Development to embed automated tests into deployment pipelines and reduce regression cycle time.
- Led a team of 4 QA engineers, mentoring them on automation best practices and managing the maintenance of the test suite.

Automation Test Engineer

Mar 2019 – Jun 2020

Technicolor

Bengaluru, India

- Built a Python/Django web application to visualise performance test data and make results easily consumable across teams.
- Evaluated open-source tooling (Xnee, Idtp2, dogtail) to automate GUI test cases on Linux and standardised the chosen approach across engineering teams.
- Set up a CI/CD pipeline using Git and Jenkins and supported migration of repositories between version control hosting providers.

Software Test Engineer

UST Global

May 2018 – Feb 2019

Bengaluru, India

- Implemented automation scripts using PowerShell and AutoIt, expanding automation test coverage by an additional 20%.
- Operated as a SCRUM engineer — gathered requirements, designed test cases, and executed System Integration Testing for upcoming features.
- Automated tests for new features while maintaining and stabilising the existing automation suite.

Associate Consultant

Capgemini

Jul 2015 – Feb 2018

India

- Created and maintained automated test scripts using Selenium WebDriver across multiple client engagements.
- Drove team adoption of complementary tools such as AutoIt, expanding automation coverage by 5% and pushing overall coverage to 85%.
- Authored Test Specification documents and detailed test cases for upcoming features.
- Performed Integration, Regression, and Ad-hoc testing on Linux and Windows platforms as part of cross-functional manual QA efforts.

CORE SKILLS

- | | | |
|--------------------|--------------------|-------------------|
| ▶ TypeScript | ▶ JavaScript | ▶ Java |
| ▶ Python | ▶ Shell Scripting | ▶ PowerShell |
| ▶ Playwright | ▶ Cypress | ▶ Selenium |
| ▶ REST API Testing | ▶ AI / LLM Tooling | ▶ TestRail |
| ▶ Jenkins | ▶ Docker | ▶ Kubernetes |
| ▶ AWS | ▶ Azure | ▶ VMware |
| ▶ Git | ▶ JIRA | ▶ CI/CD Pipelines |

EDUCATION

Bachelor of Technology, Computer Science

Dharmsinh Desai Institute of Technology, Nadiad, India

Jun 2011 – Apr 2015

CGPA: 7.3 / 10

PERSONAL PROJECTS

Cold Storage Monitoring System

Dec 2014 – Apr 2015

- Built a real-time cold-storage monitor using a Raspberry Pi with camera, motion, and thermal sensors — sending live temperature alerts and capturing motion events at the entrance.

Telegram Bot in Python

Feb 2018 – Apr 2018

- Developed a Telegram bot using the Telegram Bot API and the Python requests module to handle interactive messaging workflows.
